

Unlock Innovative Capabilities for your AquaEdge® 23XRV Chiller

Carrier's Product Integrated Control (PIC) Retrofits are designed to elevate your HVAC system's efficiency, monitoring, and performance. Our expert service technicians are equipped to identify any service issues you might encounter and provide continuous recommendations throughout the life cycle of your equipment. Whether your system is brand new or has been in use for years, the controls ensure it operates optimally, and seamlessly adapts to existing protocols.

Key Benefits

User-friendly Interface

Touchscreen display for greater usage and operating efficiency.

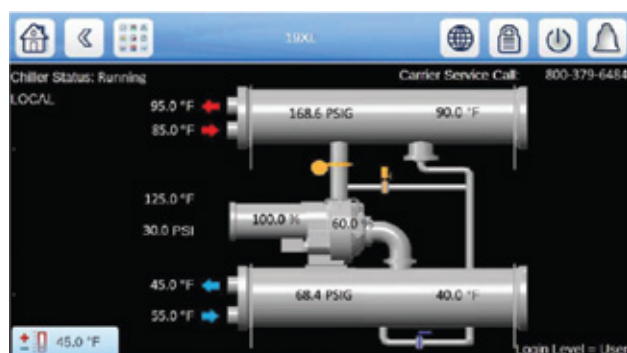

Updated Technological Control Panel

Digital connectivity to deliver remote, cloud-based monitoring, proactive diagnostics and more.

Extended Chiller Lifespan

Easily upgrades your chiller and monitors overall HVAC performance.
