

Cold Storage

Refrigeration Total Solution

In 1902, Dr. Willis Carrier invented the first modern air conditioning system in the world, which making him one of the 100 most influential people of the 20th century.

In 1877, the first refrigeration technology invented by Mr. Carl von Linde was patented, marking the application of modern refrigeration technology in scientific research, industry and commerce and families.

Carrier Company

Carrier is a world leader in heating, air-conditioning and refrigeration solutions.

Haier Carrier

Haier Carrier Refrigeration Equipment Co., Ltd. (Qingdao) was a joint venture established by Haier Group and US Carrier in 2001. After more than ten years of development, it has become a world-class facility. Its products include supermarket display cabinets (more than 1,000 specifications), compressor units (scroll, piston and screw), and heat exchangers (air-cooled condenser and air cooler). It can provide customers with whole sets of freezing and refrigerating solutions. Relying on the support of Carrier's R&D centers in Mainz, Germany and Shanghai, China, the company now has a nationally recognized laboratory, and the products and system technologies of Haier Carrier are leading in the world. The company is committed to providing advanced energy-saving systems, including carbon dioxide systems, for customers in the Asia Pacific region.

In the past ten years, relying on abundant resources of the parent company, Haier Carrier has become a world-class facility that owns the ISO9001 certification and the ACE certification of United Technologies (Carrier's parent). With strong R&D strength, we are able to provide world-class freezing and refrigerating integrated solutions such as D2D hot gas defrosting (national patent), Ground Water (GSHP technology dedicated for freezing and refrigerating purposes), HybridCO2OL (carbon dioxide cascade refrigeration technology), and CO2OLtec (carbon dioxide transcritical refrigeration technology).

Carrier new intelligent production base

Carrier is committed to innovative revolution and intelligent manufacturing. Since December 18, 2018, its new intelligent production base has been relocated to No. 3734, Tuanjie Road, Huangdao District, Qingdao.

The area of the new factory has been greatly expanded, and more newly upgraded production lines have been equipped, which has increased the production capacity by about 45%; the laboratories have been comprehensively upgraded and the number has doubled. The laboratory has a complete set of experimental verification system and experimental equipment. At present, there are 3 double-station commercial display cabinet laboratories, which adopt domestic or international advanced equipment; and product parameters meet or exceed national standards, so as to protect food safety; An 24-hour multi-functional testing laboratory for air-cooled, water-cooled condensing units, as well as air coolers and condensers, can be used for timely detection to ensure energy-saving and reliable products, responsible for the end user.

Integrated System Method

Our Patents Refrigeration Display Case

Refrigeration Circuit, Gas-Liquid Separator and Heating And Cooling System

Carrier has obtained nearly **100** patents for its core technologies in the field of commercial refrigeration. These patents are applied in Europe, the US, China and other countries and regions in the world, making Haier Carrier ahead in the industry in terms of depth and width.

THE ROAD OF INNOVATION

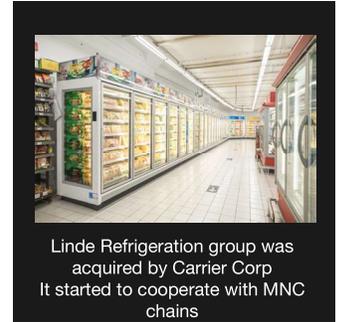

In Haier Carrier, innovation is our philosophy all the time

The company was established

It started its export business

Linde Refrigeration group was acquired by Carrier Corp
It started to cooperate with MNC chains

2001

2003

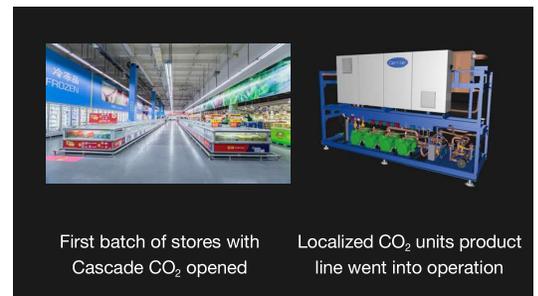

2004

EEL Energy Efficiency Certification

GCGA Credit Certification

New supermarket & C-store products were launched

First batch of stores with Cascade CO₂ opened

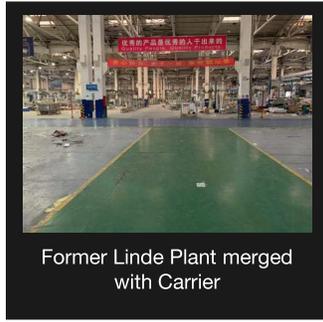

Localized CO₂ units product line went into operation

2014

2016

First D2D unit in China

Former Linde Plant merged with Carrier

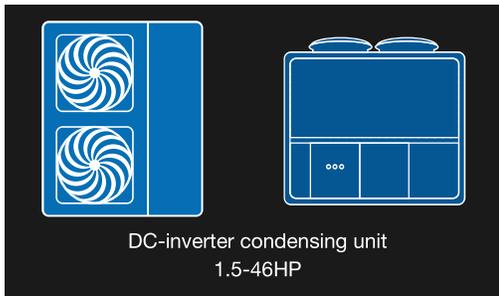

The first store with CO₂ pumping system opened

2007

2008

2012

DC-inverter condensing unit
1.5-46HP

New intelligent production facility went into operation

Full series air/water cooling MT/LT DC Inverter Racks

2017

2018

2019

GCCA Credit Certification

Carrier is

First One Certified by Commercial Refrigeration Enterprise

- The scope of certification covers cabinets and condensing units, ensuring the right temperature, food safety and advantage of energy efficiency
- Certificated by Hefei General Machinery Product Certification Co., Ltd., a certification authority in refrigeration industry
- Cabinet remote type and plug-in open type

Carrier

Your equipment doctor and store steward

Service centers

14

Service stations

200+

Outstanding staffs for superior services

- All service engineers of Carrier are refrigeration experts
- To improve the technical capacity of each engineer, we have developed well-targeted training and development plans for each engineer

24/7 Call Center

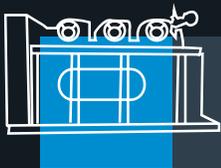

- 24/7 repair call hot line
- Professionally trained customer service representatives at your services
- Advanced call-center system and database management system
- Whole-process tracking the operation of the equipment to ensure failure detection and timely repair
- All-round services including sales, complaint handling and maintenance
- Call back to listen to what the customer have to say
- Evaluating the service management for the managers provide them with services and product quality data

Remote control

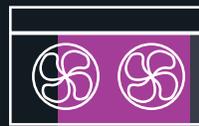

- The monitoring software monitors the equipment in your stores and sends the information to Carrier Monitoring Center
- The information is analyzed by the engineers at the monitoring center
- If necessary, the engineers at the monitoring center will inform the related service technicians to check on site
- The equipment failures in the stores are solved by Carrier before the customers are aware of them

Units

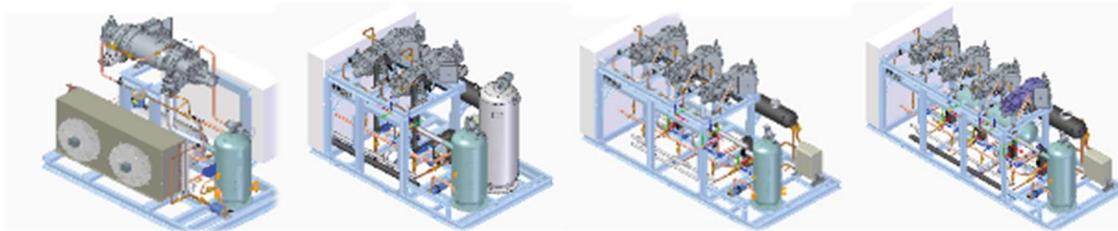

New Platform Modular MT/LT Screw Parallel Racks

Customer Value

- 120 models, more flexible choices under corresponding cooling capacity
- Optimized structural parameters, Compared with existing screw units for modular design
- Use the Carrier Carlyle stepless slide valve to regulate the compressor, saving energy by ~10% - 20%
- Siemens PLC controller, 10-inch graphical operation interface with friendly HMI, which is more versatile
- Suitable for various conventional refrigerants R22/ R404A/R448A
- More customized and flexible option configuration.
- New platform frame structure is convenient for maintenance

Design Features

- Total cooling capacity of the unit is 50~600HP, and refrigerants R404A, R22 and R448A are Suitable
- Carlyle screw compressor, 6 low temperature and 4 medium temperature units, consisting of 1-4 compressor units. The unit has 1-4 heads, and the capacity adjustment range is:
 - Single head unit: 25 -100%
 - Two head units: 12.5% - 100%
 - Three head units: 8.3% - 100%
 - Four head units: 6.3% - 100%
- Integrated skid (frame) design with compact structure
- Fully automatic control system for remote monitoring
- High-grade suppliers selected to ensure quality

* All comparisons are based on the product performances of last generation.

Application Scenarios

MT Screw Unit

Refrigerant: R404A/R22/R507A
 Cooling capacity: 103~1050kW (R22)
 112~1140kW (R404A/R507A)
 Evaporation temperature: -15°C ~+5°C
 Storage temperature range:
 -10°C ~+15°C

LT Screw Unit

Refrigerant: R404A/R22/R507A
 Cooling capacity: 58~662kW (R22)
 62~666kW (R404A/R507A)
 Evaporation temperature: -45°C ~-15°C
 Storage temperature range:
 -40°C ~-5°C

* The cooling capacity range is based on: evaporation temperature: medium temperature -10 °C, low temperature -30 °C; condensation temperature: 40 °C; supercooling / superheating: 0/10K

High Temperature Storage

Storage temperature: 0°C~10°C
 Storage capacity: 1000~3500 t
 Goods storage:
 Vegetables, fruits, etc.

Medium Temperature Storage

Storage temperature: -20°C~0°C
 Storage capacity: 2000~8000 t
 Goods storage:
 Meat, fish, etc.

Low Temperature Storage

Storage temperature: -40°C~-20°C
 Storage capacity: 2000~8000 t
 Goods storage:
 Seafood, meat, ice cream, etc.

Single Quick Freezing Line

Freezing temperature: -28°C~-32°C
 Quick freezing line capacity:
 0.5 t/h ~ 2 t/h
 Goods storage:
 Seafood, frozen food, etc.

Product Standard Configuration Options

Standard configuration of LT unit:

- Compressor
- Compressor suction valve, detachable suction filter
- Compressor exhaust valve
- Oil separator
- Oil supply circuit detachable oil filter
- Oil supply branch detachable oil filter
- Exhaust check valve
- Return air stop valve
- Liquid supply stop valve
- Detachable liquid supply drying filter
- Oil cooling system
- Each compressor is equipped with an economizer

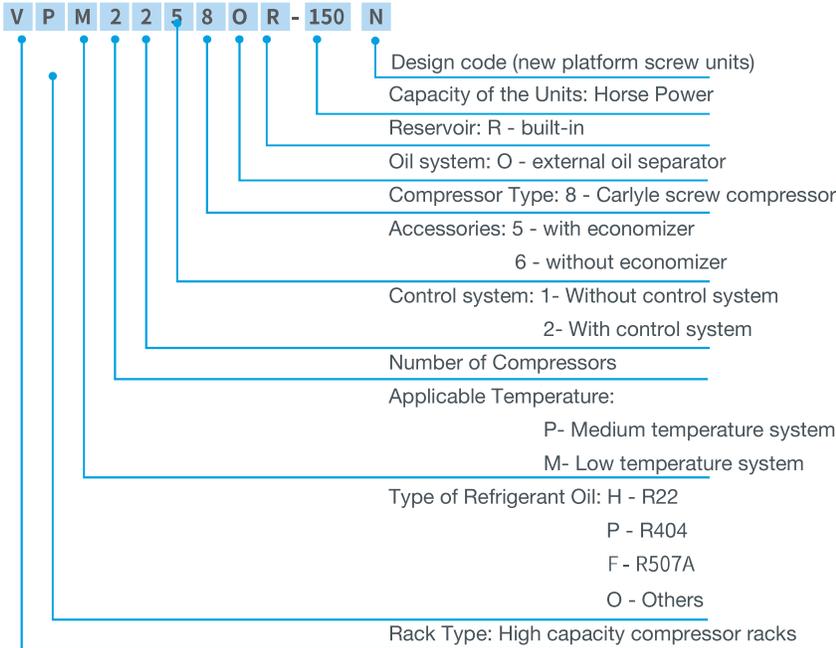

Standard configuration of MT unit:

- Compressor
- Compressor suction valve, detachable suction filter
- Compressor exhaust valve
- Oil separator
- Oil supply circuit detachable oil filter
- Oil supply branch detachable oil filter
- Exhaust check valve
- Return air stop valve
- Liquid supply stop valve
- Detachable liquid supply drying filter

Product Standard Configuration Options

- Multi-branch liquid supply assembly (including stop valve)
- Multi branch return air assembly (including stop valve)
- Exhaust constant pressure valve (generally selected in North China)
- External electric heating assembly for oil separator for northern area
- Oil cooling mode selection: water cooling, air cooling, siphon cooling
- Medium temperature unit with economizer assembly
- Oil distribution cooling assembly of medium temperature unit
- The accumulator is external or the volume of the accumulator increases(the volume of the accumulator needs to be increased when the end is aluminum or steel)
- Shell and tube condenser

Naming Rule of Screw Units

LT Screw Rack's Cooling Capacity and Input Power (R404A/R507A) - with Economizer
