

**Mark Jones
Business Manager
Controls**

Mark Jones is the Business Manager for Carrier Controls. He oversees Carrier's building automation and controls solutions, including Connect™ thermostats, the ClimaVision light commercial control system, and the Carrier i-Vu® building automation system. He also oversees Carrier's OEMCtrl business, which makes control solutions for HVAC equipment manufacturers. OEMCtrl is part of Automated Logic, a Carrier Company.

With over 30 years of industry experience, Mark brings a broad background to the position including roles in support, engineering, and management.

Mark earned a bachelor's degree in electrical engineering from the University of Connecticut Storrs and a master's degree in business administration from Rensselaer Polytechnic Institute in New York.
