

Suresh Ram

**Managing Director, Global Controls, Fire & Security
Carrier**

Suresh Ram is Managing Director, Global Controls, Fire & Security, for Carrier, leading the company's Fenwal Controls, UTEC and Fireye brands. In this role, he is responsible for delivering electronic controls, sensors, user interfaces, burner management systems and flame safeguards to serve HVAC, refrigeration, and industrial markets.

Suresh brings extensive experience in growing global businesses with roles in general management, sales, marketing and operations in HVAC, semiconductor and industrial automation industries through product innovation, operational effectiveness and share expansion.

Suresh has led the introduction of new technologies in wireless communications, healthy buildings, consumer products, automotive, medical imaging and IoT solutions in transport refrigeration and connected assets.

Prior to joining Carrier in 2020, Suresh served as President, u-blox America, a semiconductor company specializing in IoT, cellular, WiFi, bluetooth and positioning products. Previous positions held include senior management roles at Infineon Technologies, Danaher and National Semiconductor.

Suresh holds a master's degree in electrical engineering from Clemson University and a MBA from Santa Clara University.
